

Product Collection 2026/27

Engineering Performance. Assured.

About Kesari Conchem

Kesari Conchem delivers engineering-led construction chemical solutions designed to solve critical site challenges like leakage, structural deterioration, and durability failures.

We focus on performance, not just products, ensuring long-term protection, structural reliability, and reduced lifecycle costs.

Special Features

- Engineering-driven formulations
- Proven on-site performance
- Long-term durability & lifecycle value
- Easy application for real site conditions
- Complete waterproofing & repair systems

Product Categories

INTEGRAL WATERPROOFING & ADMIXTURES

Built into the structure for long-term protection

Enhances concrete and mortar performance from within by reducing permeability and improving bonding.

Kesari Waterproofing Compound

LIQUID INTEGRAL WATERPROOFING COMPOUND
FOR CONCRETE AND PLASTER

Key Features:

- Reduces capillary action and water seepage
- Improves water tightness of concrete and plaster
- Enhances workability and mix cohesion
- Prevents segregation and bleeding
- Minimizes shrinkage cracks
- Chloride-free → Safe for reinforced structures

Applications: Concrete, plaster, water tanks, foundations

Pack Size: 5 kg / 20 kg

Kesari Aqua Con

EXCELLENT WATERPROOFING COATING

Key Features:

- Reduces water permeability → Improves impermeability of concrete
- Enhances workability without increasing water content
- Increases flexural, tensile & bond strength
- Minimizes shrinkage cracks and surface defects
- Acts as bonding agent for old-to-new concrete
- Protects against chloride, sulphate, and corrosion attack

Applications: Terraces, sunken slabs, masonry coatings

Pack Size: 5 kg / 20 kg

Kesari Aqua-Con Plus

HIGH PERFORMANCE ACRYLIC WATERPROOF COATING & REPAIRS

Key Features:

- Enhances impermeability by reducing capillary water flow
- Improves flexural, tensile & bond strength
- Acts as a strong bonding agent for old-to-new concrete
- Reduces shrinkage cracks and surface defects
- Resistant to UV exposure, chlorides & sulphate attack
- Prevents blistering by allowing moisture vapour escape

Applications: Repairs, terraces, waterproof coatings

Pack Size: 5 kg / 20 kg

Kesari Aqua Stop 2K (Premium)

SPECIALTY SBR LATEX FOR REPAIRS & WATERPROOFING

Key Features:

- Provides excellent water impermeability for long-term protection
- Ensures strong bonding between old and new substrates
- Enhances flexural, tensile & bond strength
- Improves workability at reduced water-cement ratio
- Acts as anti-corrosive protection for steel reinforcement
- Improves abrasion resistance and durability of surfaces

Applications: Roof waterproofing, repairs, structural bonding

Pack Size: 5 kg / 20 kg

Kesari Aqua Bright

HIGH PERFORMANCE ACRYLIC PROTECTIVE
WATERPROOF DECORATIVE COATING

Key Features:

- Protects against carbon dioxide, chlorides & sulphate attack
- Excellent UV resistance for long-term durability
- Resistant to chalking, flaking, and weathering
- Anti-fungal and anti-algae properties for cleaner surfaces
- Low dirt pickup → Maintains long-lasting aesthetics
- Easy to clean and maintain surface finish

Applications: Exterior walls, masonry, decorative finishes

Pack Size: 5 kg / 20 kg

Kesari Flexi Proof

SBR LATEX FOR REPAIRS AND WATERPROOFING

Key Features:

- Provides strong bonding between old and new concrete
- Enhances flexural, tensile & bond strength
- Reduces water permeability and shrinkage cracks
- Improves workability at low water-cement ratio
- Protects reinforcement with anti-corrosive properties
- Improves durability under continuous water exposure

Applications: Repairs, screeds, bonding coats

Pack Size: 5 kg / 20 kg

CEMENTITIOUS WATERPROOF COATINGS

Surface-applied structural waterproofing systems

Kesari Flexi Lock

TWO PACK HIGH PERFORMANCE ACRYLIC
POLYMER MODIFIED CEMENTITIOUS COATING

Key Features:

- Protects against water penetration, chlorides, carbonation & sulphates
- Flexible coating that bridges hairline cracks
- Safe for potable water contact (certified)
- Non-corrosive to steel reinforcement
- High resistance to weathering and UV exposure
- Strong adhesion to concrete and masonry surfaces

Applications: Concrete, plaster, water tanks, foundations

Pack Size: 5 kg / 20 kg

Kesari Pro-Seal HS

TWO PACK HIGH PERFORMANCE ACRYLIC
POLYMER MODIFIED CEMENTITIOUS COATING

Key Features:

- Protects against water penetration, chlorides, carbonation & sulphates
- Flexible coating that bridges hairline cracks
- Approved for potable water contact
- Non-corrosive to steel reinforcement
- High resistance to weathering and UV exposure
- Strong adhesion to concrete and masonry surfaces

Applications: Water structures, terraces, foundations

Pack Size: 5 kg / 20 kg

Kesari Ultra-Bond

TWO-COMPONENT ELASTOMERIC POLYMER
MODIFIED CEMENTITIOUS WATERPROOF COATING

Key Features:

- Transparent finish → Retains original surface aesthetics
- Deep penetration with nano emulsion technology
- Provides effective, long-lasting waterproofing
- High flexibility with crack-bridging capability
- Strong resistance to UV, IR rays, algae & fungal growth
- High abrasion resistance for durable terrace protection

Applications: Roofs and terraces, wet areas (bathrooms, kitchens), water tanks and swimming pools, basements and underground structures, heavy-duty waterproofing applications

Pack Size: 40 kg (Liquid 20 kg + Powder 20 kg)

ACRYLIC WATERPROOF COATINGS (TERRACE & EXTERIOR)

Flexible, UV-resistant protection for exposed surfaces

Kesari Zero-Damp

ELASTOMERIC COATING WITH REINFORCED FIBRES
FOR TERRACE & ROOF WATERPROOFING

Key Features:

- Forms a seamless, high-build waterproof membrane
- Bridges cracks up to 2 mm, preventing seepage
- UV and weather resistance for long-term durability
- Anti-fungal and anti-algae properties for cleaner surfaces
- Breathable coating allows moisture vapor escape
- Ideal for heavy-duty terrace waterproofing applications

Applications: Terraces, roofs, external walls

Pack Size: 5 kg / 20 kg

Kesari Flexi Top

HEAVY DUTY REINFORCED ACRYLIC WATERPROOF COATING FOR TERRACE

Key Features:

- Fiber-reinforced system for strength and durability
- Bridges cracks up to 2 mm, preventing leakage
- High solar reflectance → Reduces surface heat significantly
- Excellent UV and weather resistance
- Forms a seamless, joint-free waterproof membrane
- Easy liquid application for efficient on-site execution

Applications: Roofs, balconies, parapets

Pack Size: 5 kg / 20 kg

Kesari Cool Roof

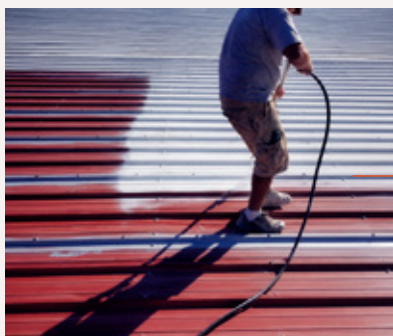

TRANSPARENT UV RESISTANT READY TO USE WATERPROOFING COATING

Key Features:

- Transparent finish → Retains original surface aesthetics
- Deep penetration with nano emulsion technology
- Provides effective, long-lasting waterproofing
- High flexibility with crack-bridging capability
- Strong resistance to UV, IR rays, algae & fungal growth
- High abrasion resistance for durable terrace protection

Applications: China chips, paver blocks, terraces

Pack Size: 5 kg / 20 kg

Kesari Flexi-Top HI

HIGH-PERFORMANCE ELASTOMERIC
WATERPROOF COATING

Key Features:

- Reduces surface temperature and heat ingress
- Provides effective waterproofing for exposed structures
- High resistance to UV, ozone, and oxidation
- Improves energy efficiency by lowering indoor cooling load
- Flexible coating with crack-bridging capability
- Durable under long-term weather exposure

Applications: Roofs and terraces, balconies and parapet walls, asbestos and metal roofs, exterior masonry surfaces, air-conditioned buildings and cold storage facilities

Pack Size: 20 kg

POLYURETHANE & HYBRID WATERPROOFING SYSTEMS

High-performance concealed waterproofing

Kesari Flexi PU 250

ONE COMPONENT, POLYURETHANE BASED HYBRID
LIQUID APPLIED WATERPROOFING COATING FOR
CONCEALED APPLICATIONS

Key Features:

- Hybrid PU + Bitumen system for enhanced flexibility and durability
- Bridges hairline cracks → Prevents leakage under movement
- Excellent adhesion to concrete, brick, and plaster surfaces
- Fast curing → Speeds up project execution
- Eco-friendly, water-based formulation for safe indoor use
- Resistant to thermal and mechanical vibrations

Applications: Wet areas, balconies, sunken slabs

Pack Size: 5 kg / 20 kg

Kesari White Armor PU

BITUMEN MODIFIED SINGLE COMPONENT LIQUID
APPLIED WATERPROOFING COATING

Key Features:

- Cold applied → No heating, faster application
- Forms a seamless, joint-free waterproof membrane
- Acts as a vapour barrier, preventing moisture penetration
- Protects against chloride & sulphate attack
- Flexible coating that adapts to structural movement
- Ensures long-term durability of foundations and substructures

Applications: Foundations, basements, retaining walls

Pack Size: 5 kg / 20 kg

Kesari Black Armor PU

BITUMEN MODIFIED SINGLE COMPONENT LIQUID
APPLIED WATERPROOFING COATING

Key Features:

- Cold applied → No heating required, faster execution
- Creates a joint-free, seamless waterproof barrier
- Acts as an effective vapour barrier
- Protects against chloride & sulphate penetration
- Flexible coating accommodates structural movement
- Ensures long-term protection for foundations and substructures

Applications: Basements, wet areas, underground structures

Pack Size: 5 kg / 20 kg

BONDING AGENTS & SURFACE PREPARATION

Enhancing adhesion and execution efficiency

Kesari Anti-Hack

SPECIALITY POLYMER LATEX THAT ELIMINATES NEED FOR HACKING

Key Features:

- Eliminates surface hacking → Saves labour, time, and cost
- Prevents structural damage caused by chipping
- Ensures strong, long-lasting plaster bonding
- Suitable for interior and exterior applications
- Improves work efficiency on-site
- Economical solution for large-scale projects

Applications: Plaster bonding, repair works, tile applications

Pack Size: 5 kg / 20 kg

Kesari Gyp Bond S

HIGH-PERFORMANCE BONDING AGENT
DESIGNED TO ENSURE STRONG ADHESION

Key Features:

- Ensures excellent bonding between gypsum and concrete
- Eliminates plaster debonding and surface failures
- Suitable for new and existing structures
- Improves surface integrity and application reliability
- Reduces rework and long-term maintenance issues

Applications: Concrete shear walls, columns, ceiling slabs, smooth concrete surfaces before gypsum plastering, new and old structural surfaces

Pack Size: 20 kg

REPAIR & PROTECTION SYSTEMS

Kesari Crack Filler

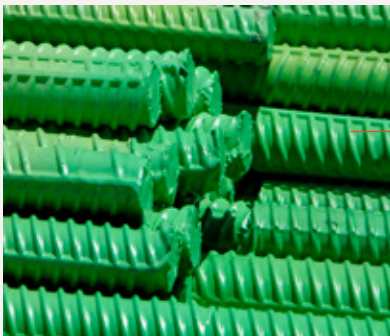

HIGH-PERFORMANCE CRACK-FILLING COMPOUND
DESIGNED TO REPAIR AND SEAL CRACKS

Key Features:

- Non-sag formulation for easy vertical application
- Zero shrinkage → No re-cracking after application
- Non-yellowing finish for consistent surface appearance
- Resistant to chalking and surface degradation
- Ensures strong crack sealing and surface integrity

Applications: External and internal plastered brick masonry walls, surface cracks up to 5 mm width and pre-treatment before painting or coating applications

Pack Size: 1 kg / 5 kg

Kesari Steel Shield

AQUEOUS POLYMERIC ALKALINE PROTECTIVE COATING

Key Features:

- Provides effective anti-corrosion protection for TMT bars
- Protects reinforcement from moisture and chemical attack
- Enhances structural life and durability
- Improves bond between steel and concrete interface
- Easy application with uniform coating coverage

Applications: TMT bars before concreting, RCC structures, repair and rehabilitation projects, structures exposed to moisture and aggressive environments.

Pack Size: 1 kg / 5 kg
